

AND

The **InFuse Group** is pleased to announce an agreement to partner with **Safetyscope Inc.** to provide direct classroom training and full field resources for **Confined Spaces**.

Safetyscope is also a CPO approved training provider to deliver their **Working at Heights** program as set by the Ontario Ministry of Labour Training, Skills Development.

Safetyscope's confined space rescue teams have the required industrial safety training techniques and are outfitted with the equipment to undertake efficient rescue operations.

Part of Safetyscope's confined space rescue service is the implementation of a proper pre-plan for specific confined space work. We'll help our clients complete hazard assessments, review lockout and tagout procedures, ensure the integrity of permits, and demonstrate the proper use of personal protective equipment. We'll ensure that an effective rescue plan and safety procedures are in place and all personnel involved are informed of their responsibilities.

Safetyscope's confined space rescue teams also have the backup of experienced and certified emergency medical professionals, and fully equipped mobile medical units.

Contact InFuse and we will provide you with an introduction to Safetyscope.
