AND

The **InFuse Group** is delighted to announce a reciprocal partnership with **Newman Human Resources Consulting Inc.** who will provide on demand HR services to our clients who don't have, or don't need a full time Human Resources Department. They are the client's "fractional" HR Team when needed for routine work or difficult people situations.

NewmanHR is headed by Frank Newman C.H.R.L. with a team of 14 associates. **NewmanHR** provides expert HR services and advice on health & safety, performance management, compensation and recruiting, uniquely tailored to their clients' needs. They are not a "grab and go" HR resource, but instead use their in-depth knowledge to resolve issues creatively and pragmatically. **NewmanHR** has a combined experience that most organization, small and large, would be envious of.

NewmanHR is also one of only ten consulting practices in Canada who are accredited as **Great Place to Work Professionals** . Accredited Professionals are trained on the Great Place to Work® methodology, the globally recognized gold standard for measuring trust and driving culture in business environments.

Accredited Professionals master the analysis of Trust Index® survey data, identifying key drivers and actionable insights that leverage the employee experience to drive business results. Accredited Professionals use data and rigorous methodology to formulate strategies that improve business performance, build a healthy culture and help clients meet their Employer of Choice goals.
